

AIC E_{TOT} : -317.840, AIC R_{TOT} : -321.824
 $\Delta\text{AIC} = 3.984$
 Weak evidence that R_{TOT} is a
 better predictor ($2 \leq \Delta\text{AIC} < 4$)

AIC E_{TOT} : -504.832, AIC R_{TOT} : -497.577
 $\Delta\text{AIC} = 7.255$
 Strong evidence that E_{TOT} is a
 better predictor ($\Delta\text{AIC} \geq 7$)

AIC E_{TOT} : -585.436, AIC R_{TOT} : -584.765
 $\Delta\text{AIC} = 0.671$
 No substantial evidence that
 either predictor is better ($\Delta\text{AIC} < 2$)

AIC E_{TOT} : -760.140, AIC R_{TOT} : -759.696
 $\Delta\text{AIC} = 0.444$
 No substantial evidence that
 either predictor is better ($\Delta\text{AIC} < 2$)
